● **WORK EXPERIENCE**

SOFTWARE DEVELOPER – SIGP SYSTEMS (SKODA AUTO) – 09/2019 – Current – ŽILINA, SLOVAKIA

SKODA AUTO - web applications:
web applications and tools. Microfrontend architecture facilitates seamless integration of web applications and tools into other web applications.

Stock and Used cars - A marketing web application that offers users information about vehicles available for purchase from dealers in their selected region.

Finance Calculator - An application designed to offer financing details for selected models. Users can customize installment and insurance parameters to receive tailored financing solutions for optimal results.

Skoda Forms - A comprehensive solution comprising an admin dashboard for crafting form definitions and a microfrontend application capable of rendering these forms seamlessly

Dealer Locator - A microfrontend app utilizing the Google Maps API to display Škoda dealer locations and information. Designed for seamless integration into Škoda websites, it offers an interactive map and enhanced user experience for locating dealerships.

Accessories - Built and integrated a microfrontend solution for promoting vehicle accessories across stock and used car systems, allowing seamless accessory selection during the vehicle reservation process.

Applications aimed at promoting electric mobility:

Charging Calculator - An application designed to calculate the necessary charging time, taking into account factors such as initial battery level, travel distance, and the type of charging station.

Skoda Powerpass Tariff Calculator - The application calculates the most suitable tariff for users based on their specified model and charging preferences

Fuel Savings Calculator - The application computes annual savings by comparing the costs of fossil fuel and electricity.

Utilities:

Marvin 3 - An administration dashboard empowering administrators or importers to configure the mentioned applications

Shared libraries - repository housing internal libraries and tools, featuring a components library, services library, various microfrontend loaders, and Storybook for showcasing components and microfrontend applications.

Activities & Responsibilities:

- Implementing web applications in **Asp.Net core** and **React**.
- Sustaining and integrating new features into existing applications,
- fixing bugs, releasing hotfixes
- Creating and maintaining build and release pipelines in Azure DevOps.
- Writing and maintaining internal libraries (components, services, microfrontend module loaders, etc.).
- Writing component and visual tests, maintaining code coverage and code readability
- Updating or replacing outdated technologies in projects
- collaboration with the architecture team and designing solutions related to microfrontend technology
- Rewriting existing apps into microfrontend architecture
- Collaborating with the team developing web components and making contributions to the library.
- pull request reviews, participation in planning events etc.

Technologies: Asp.Net core, TS, React, Redux, Saga, jotai, material-ui, bootstrap, Cypress, Storybook, FeatureHub, Google maps api, npm workspaces, git, devops.

SOFTWARE ARCHITECT & SOFTWARE DEVELOPER – SYNOT GAMES SK – 01/01/2025 – 30/06/2025 – BRATISLAVA, SLOVAKIA

Tercius - Architected and implemented a microfrontend-based platform for game and client management, supporting modular scalability and independent deployments.

Activities & Responsibilities:

- Defined and designed the microfrontend frontend architecture.
- Implemented the frontend solution in line with defined architectural standards.
- Mentored and trained developers to take ownership of the project.
- Provided technical leadership, consultations, and code reviews.
- Delivered new functionalities and continuous improvements.
- Designed, wrote, and maintained frontend component tests.

Technologies: React, Mui, Router, Feature Hub, TanStack libs (Form, Table, Query), Vite, Storybook, Cypress, ASP.NET core, OAuth 2.0

SOFTWARE DEVELOPER – SIGP SYSTEMS (ASSECO SOLUTIONS) – 06/2019 – 10/2019 – ŽILINA, SLOVAKIA

Asseco Solutions - Helios Green: Helios Green is desktop application for processing of economic data for large-scale and medium-sized companies.

Activities & Responsibilities: Technical assistance in design of a new Helios Green Client application look. Analysis of client installation processes, design and implementation of Clients Manager Application. Application allows to manage instances of Helios Green clients on user computer. Application consists of backend, **Asp.Net core** application enhanced with **MediatR** hosted locally as windows service. Fronted was developed with **Angular, material**, and store architecture (**Redux, ngRx, rxjs**) and built using **Electron** to work as desktop application. Client is running in tray and gets **SignalR** notifications from worker service about installation progress. Solution is distributed in msi installation package and is able to self actualize.

Technologies: .Net C#, Asp.Net core, SignalR, WPF, Angular, Material, NgRx, Electron

SOFTWARE DEVELOPER – KROS A.S. – 30/06/2017 – 31/05/2019 – ŽILINA, SLOVAKIA

Database analysis tool (07/2017- 09/2017): An intern application used by the Olymp testers to compare and select appropriate databases for testing.

Activities & Responsibilities: This was my startup project in the company. My responsibility was to design and develop a solution based on consultation with the testers.

Technologies: Visual Basic .Net, SQL

Olymp (10/2017- 04/2018): Employee data recording program, payroll calculation and export and import of data from other economic programs.

Activities & Responsibilities: I worked on conversion of reports from SAP Crystal to Devexpress. Then I worked on tasks in program Olymp and bug fixes. I also worked on several intern tools:

- tool to transfer data from database of another application,
- Olymp Troubleshooter (diploma thesis),
- tool that generates output with an overview of the number of generated payouts

Technologies: C#/Visual Basic .Net, WinForms, SQL, Entity Framework

Olymp Troubleshooter (10/2017- 05/2018): The company offered me the opportunity to work on my thesis. Olymp Troubleshooter is module for program Olymp. The tool can solve some problems without the need for a fix release. Module communicates with the web service, securely downloads the repair files that fixes the problem directly on the user's computer.

Activities & Responsibilities: I was responsible for all phases of development. I analyzed the known bugs, designed and implemented a solution. I was also responsible for choosing the right encryption algorithm and its implementation what results in a library for securing files using Elliptic Curve Digital Signature Algorithm.

Technologies: C# .Net, WPF, Roslyn, Asp.Net core, SQL, Entity Framework core, Angular, Material Design, Azure, ECC

CENKROS (5/2018- 06/2019): Program allows to create budgets and bidding for construction projects, to use price lists databases, calculations, budgets actualization and more functionalities. The project also includes an online license management tool, a new web-based platform for managing and viewing BIM building models and Import Excel Univerzal, a tool to import data from Excel files of different formats.

Activities & Responsibilities: At the beginning I worked on the tasks of the CENKROS program and bug fixes. After three months, we started working on a new data import tool where I was responsible for implementation. Then I worked on a web-based building management platform. I've been working on the backend for about three months.

Technologies: C#/Visual Basic .Net, WinForms, SQL, RavenDB, Asp.Net core, Angular, Identity Server 4, Azure, Refit, Ocelot, SignalR, RabbitMQ

SOFTWARE DEVELOPER – SW-TECH, S.R.O. – 31/05/2016 – 31/05/2017 – ŽILINA, SLOVAKIA

This was my first attempt in IT jobs. I was working on an application for executing database scripts and was creating libraries used by SharePoint applications.

Technologies: C# .Net, SQL, WPF, TypeScript, Roslyn

SKILLS

Frontend React

React/Redux | Saga | Jest/Enzyme | Storybook | MUI | cypress

Frontend Angular

ANGULAR 6+ | Angular Material | NGRX/RXJS

Frontend other

Electron | BOOTSTRAP 3/4 | TYPESCRIPT | HTML CSS3 Javascript | Cordova

Development and other experiences

TFS | WPF | Microsoft Azure (basics) | WinForms | Google Console | DevExpress | MLNET | Xamarin Forms | Git

Backend

asp.net core | Entity Framework | microservices | SQL

EDUCATION AND TRAINING

08/2016 – 05/2018 Žilina, Slovakia
MASTER'S DEGREE (MASTER OF SCIENCE) Faculty of Management Science And Informatics

field of study - Data processing
thesis - Olymp Troubleshooter
technologies: .NET C#, WPF, Asp.Net core, Angular, Entity Framework core, Azure, ECC

08/2013 – 05/2016 Žilina, Slovakia
BACHELOR'S DEGREE Faculty of Management Science And Informatics

field of study - Informatics
thesis - Application for working with graphs
technologies: Java, XML, SQL

LANGUAGE SKILLS

Mother tongue(s): **SLOVAK**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	B2	B2	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user
